

Product Facts & Features

DERMAPLEX A LINE REVERSAL PEPTIDE SERUM

DESCRIPTION:

Dermaplex A is a daily anti-wrinkle serum that reduces the depth of already formed facial wrinkles caused by expression lines and has been demonstrated effective against their development. Contains 10% concentration of Acetyl Hexapeptide-8 and has been shown in independent clinical studies to reduce the depth of wrinkles up to 30% after 30 days.

KEY INGREDIENTS:

- Acetyl Hexapeptide 8 - reduces fine lines and wrinkle depth
- Hydrolyzed Wheat Protein - creates a flexible, strengthening network on the surface of the skin
- Silk Amino Acids – bonds with protein in the skin to increase moisture. Readily absorbs into the skin

BENEFITS:

- Maximum visible reduction of fine lines and wrinkles.
- Smooths out deep lines and prevents new lines from forming.
- Less invasive than painful collagen or Botox injections.

APPLICATION:

Twice daily, gently massage serum into targeted areas, including crow's feet, frown and laugh lines. Allow product to completely penetrate the skin before applying moisturizer. Apply twice daily for the first 30 days. If lines are deep, continue to apply twice daily for another 30 days, apply once daily to maintain results. May be applied over Time Erase. Do not layer with Maxifirm.

RECOMMENDATIONS:

All skin types

- Men and Women: Reduces the appearance of already formed deep expression lines and diminishes wrinkles. Smooths out frown and laugh lines between the eyebrows, on the forehead and from the nose to chin.
